

Rohit Dubey

AI Engineer

8777453162 | rohitdubey39005@gmail.com | Portfolio | GitHub | LinkedIn

EDUCATION

VIT Bhopal University, Bachelor of Technology in Computer Science (AI & ML)	Bhopal, India 2024–2028
---	----------------------------

EXPERIENCE

Frontend Web Development Intern – AKS, <i>React, JavaScript, Node.js</i>	May 2026 – Present
--	--------------------

- Ship 3–4 feature implementations and bug fixes per cycle directly to a live, Vercel-deployed production codebase, under an agile, cross-functional workflow.
- Collaborate with backend and design counterparts to translate product requirements into working components, building experience relevant to integrating AI features into production systems.

Freelance Full-Stack Developer – DevInterio (devinterio.com),	2026
--	------

- Scoped, built, and deployed a 35-page business website end-to-end, including a custom admin backend – now driving 175+ monthly users and 1,000+ tracked interactions – taking sole ownership of architecture through post-launch support with zero external help.

PROJECTS

AI Career Decision Engine <i>Claude API, Node.js, Express, REST API Design, React, Vercel, Railway</i>	Live Demo GitHub
--	--------------------

- Integrated the Claude API into a production backend to generate context-aware career recommendations from parsed user profile data, translating structured resume data into LLM prompts.
- Designed REST endpoints for PDF parsing and structured skill extraction, powering resume analysis and gap identification across 18 technical roles.
- Architected a decoupled full-stack platform (React on Vercel, Express API on Railway) to enable independent scaling of the LLM-facing backend from the client.

Brainstormzz – AI Brainstorming Canvas <i>Chrome Prompt API, OpenAI API, Prompt Engineering, Canvas API, React</i>	Live Demo GitHub
--	--------------------

- Designed a dual-inference architecture – Chrome’s on-device Prompt API as the primary LLM engine with an OpenAI API fallback – to keep inference latency low without sacrificing availability.
- Engineered prompts to drive AI-assisted idea generation on a real-time, draggable node canvas, managing conversational state across inference calls.

NoteLift – Chrome Extension (290+ Installs) <i>JavaScript, Chrome Storage API, Chrome Extension APIs</i>	Chrome Web Store GitHub
--	---------------------------

- Published and shipped a text-to-note capture extension with 290+ installs, built on a fully local, privacy-first storage architecture with zero backend dependency.
- Owned the full product lifecycle solo – design, build, publish, and post-launch support – demonstrating independent end-to-end delivery of a live AI-adjacent productivity tool.

TECHNICAL SKILLS

AI & LLM: Claude API, OpenAI API, Chrome Prompt API, Prompt Engineering, LLM Integration

Languages: Python, JavaScript (ES6+), Java, SQL, HTML5, CSS3

Machine Learning: Applied ML fundamentals, model evaluation, scikit-learn (Python)

Backend & APIs: Node.js, Express.js, REST API Design, PHP

Frontend: React.js, TypeScript, Redux, Next.js, Tailwind CSS, Canvas API

Tools & DevOps: Git, GitHub, Vercel, Railway, MySQL

LEADERSHIP & CO-CURRICULAR

Operations Head – AI Club	Nov 2024 – Present
Financial Co-Lead – Groovity	Nov 2025 – Present

CERTIFICATIONS

Applied Machine Learning in Python – University of Michigan, Coursera	December 2025
--	---------------

Oracle Certified Foundations Associate: Java – Oracle University	June 2026
---	-----------

Cloud Computing – NPTEL Elite, IIT Kharagpur	April 2026
---	------------
