EDUCATION

VIT Bhopal University, Bhopal, India
Bachelor of Technology in Computer Science (AI & ML) 2024–2028

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), HTML5, CSS3, PHP, SQL
Backend & APIs: Node.js, Express.js, REST API Design, PHP, MySQL
Frontend: React.js, Tailwind CSS, DOM Manipulation, Canvas API
Tools & DevOps: Git, GitHub, Vercel, Railway, Chrome Extension APIs
DSA & Problem Solving: Java – A2Z DSA roadmap (GitHub)
Concepts: SDLC, Agile Development, Debugging, REST API Design, Client-Server Architecture

PROJECTS

AI Career Decision Engine Live Demo | GitHub

React, Node.js, Express, REST APIs, Vercel, Railway

- Architected a decoupled full-stack platform with an independently deployed React frontend (Vercel) and Express/Node.js backend (Railway), enabling independent scaling and deployment of each layer.
- Engineered REST API endpoints for PDF parsing and structured data extraction, powering resume analysis and skill-gap identification across 18 technical roles.
- Integrated a third-party AI API into the backend service layer to generate recommendations from parsed, structured user data.

NoteLift – Chrome Extension Chrome Web Store | GitHub

JavaScript, Chrome Storage API, Chrome Extension APIs

- Built and published a text-to-note Chrome extension with 290+ installs, architected around a fully local, privacy-first storage layer with zero backend dependency.
- Delivered a capture-to-save flow for sub-second note creation from any webpage, handling storage sync and UI state entirely client-side.

Brainstormzz Live Demo | GitHub

React, Canvas API, JavaScript

- Developed an interactive brainstorming canvas application with draggable, connectable nodes and real-time state management using the Canvas API.
- Established a dual-provider fallback architecture – an on-device engine as primary with a cloud API as backup – to keep the application responsive and available under varying runtime conditions.

EXPERIENCE

Frontend Web Development Intern – AKS, May 2026 – Present

React, JavaScript, Node.js

- Develop and ship 3–4 feature implementations directly to a live, production, Vercel-deployed codebase as part of an agile, cross-functional engineering team.
- Resolve UI and component-level bugs surfaced during code review, improving reliability and long-term maintainability of the codebase.
- Collaborate directly with backend engineers and designers to translate product requirements into working, tested React components.

Freelance Full-Stack Web Developer – DevInterio (devinterio.com), 2026

HTML, CSS, JavaScript, PHP, MySQL

- Scoped and deployed a 35-page business website end-to-end – now driving 175+ monthly users and 1,000+ tracked interactions – including a custom PHP/MySQL backend and admin panel, for an interior design client.
- Created backend admin tooling for blog publishing, video management, and gallery control, replacing manual content updates with client-operated self-service workflows.
- Owned the full post-launch support cycle independently: diagnosed and resolved live server configuration and routing issues (.htaccess, caching) with zero external support.

CERTIFICATIONS

Oracle Certified Foundations Associate: Java – Oracle University June 2026

Cloud Computing – NPTEL Elite, IIT Kharagpur April 2026

Applied Machine Learning in Python – University of Michigan, Coursera December 2025
