SUMMARY

Frontend Developer with hands-on experience building responsive, component-driven web interfaces in React and vanilla JavaScript. Shipped three production applications end-to-end – from a 35-page responsive business site to a Chrome extension used by 200+ people – covering UI architecture, state management, cross-browser layout, and performance. Currently a Frontend Web Development Intern contributing directly to a live, production React codebase.

EDUCATION

VIT Bhopal University,

Bachelor of Technology in Computer Science (AI & ML)

Bhopal, India

2024–2028

EXPERIENCE

Frontend Web Development Intern – AKS,

May 2026 – Present

React, JavaScript, HTML/CSS, Responsive Design

- Joined the frontend team on a live, Vercel-deployed product and shipped UI features and bug fixes directly to production under an agile, cross-functional workflow.
- Debugged and resolved component-level and layout issues surfaced in code review, improving UI reliability, consistency, and maintainability across the codebase.
- Collaborated with backend and design counterparts to translate mockups and product requirements into responsive, reusable React components.

PROJECTS

DevInterio – Business Website (Freelance)

Live Site

HTML5, CSS3, JavaScript, Responsive Design, PHP, MySQL

- Designed and built a fully responsive, 35-page business website end-to-end for an interior design client, from information architecture to pixel-level UI implementation across devices.
- Built a self-service admin interface for blog publishing, video management, and gallery control, replacing manual content updates with client-operated tooling.
- Owned post-launch UI and performance issues independently, resolving live routing and caching bugs (.htaccess) with zero external support.

Brainstormzz – Interactive Brainstorming Canvas

Live Demo | GitHub

React, JavaScript, Canvas API, UI State Management

- Built an interactive brainstorming canvas in React with draggable, connectable nodes and real-time UI state management using the Canvas API.
- Engineered the interaction layer (drag, connect, reflow) for smooth, low-latency canvas manipulation, with a fallback inference path to keep the interface responsive under varying conditions.

AI Career Decision Engine – React Frontend

Live Demo | GitHub

React, JavaScript, REST APIs, Vercel

- Built and deployed the React frontend for a full-stack career-guidance platform, architected to be independently deployable from its backend API for faster iteration.
- Implemented the UI for resume upload, parsing feedback, and skill-gap results, consuming REST endpoints across 18 technical roles.

NoteLift – Chrome Extension

Chrome Web Store | GitHub

JavaScript, Chrome Storage API, Client-Side UI

- Published a text-to-note Chrome extension with 200+ active users, with all UI state and storage sync handled entirely client-side.
- Designed the capture-to-save UI flow for sub-second note creation from any webpage.

TECHNICAL SKILLS

Core: JavaScript (ES+), React.js, HTML5, CSS3, Responsive Design, Tailwind CSS

UI Engineering: Component Architecture, DOM Manipulation, Canvas API, Cross-Browser Compatibility, UI State Management

Tooling: Git, GitHub, Vercel, npm, Chrome Extension APIs

Backend Familiarity: Node.js, Express.js, REST APIs, PHP, MySQL

Languages: Java, Python, SQL

CERTIFICATIONS

Oracle Certified Foundations Associate: Java – Oracle University

June 2026

Cloud Computing – NPTEL Elite, IIT Kharagpur

April 2026

Applied Machine Learning in Python – University of Michigan, Coursera

December 2025
