SUMMARY

AI Engineer with hands-on experience building and shipping LLM-integrated products end-to-end – from prompt design and API architecture to production deployment. Built a full-stack platform integrating the Claude API for AI-driven career recommendations, and a dual-inference brainstorming tool combining Chrome's on-device Prompt API with the OpenAI API. Comfortable owning the full AI product lifecycle: backend API design, LLM integration, prompt engineering, and deployment.

EDUCATION

VIT Bhopal University, Bhopal, India
Bachelor of Technology in Computer Science (AI & ML) 2024–2028

PROJECTS

AI Career Decision Engine Live Demo | GitHub
Claude API, Node.js, Express, REST API Design, React, Vercel, Railway

- Integrated the Claude API into a production backend to generate context-aware career recommendations from parsed user profile data, translating structured resume data into LLM prompts.
- Designed REST endpoints for PDF parsing and structured skill extraction, powering resume analysis and gap identification across 18 technical roles.
- Architected a decoupled full-stack platform (React on Vercel, Express API on Railway) to enable independent scaling of the LLM-facing backend from the client.

Brainstormzz – AI Brainstorming Canvas Live Demo | GitHub
Chrome Prompt API, OpenAI API, Prompt Engineering, Canvas API, React

- Designed a dual-inference architecture – Chrome's on-device Prompt API as the primary LLM engine with an OpenAI API fallback – to keep inference latency low without sacrificing availability.
- Engineered prompts to drive AI-assisted idea generation on a real-time, draggable node canvas, managing conversational state across inference calls.

NoteLift – Chrome Extension (200+ Users) Chrome Web Store | GitHub
JavaScript, Chrome Storage API, Chrome Extension APIs

- Published and shipped a text-to-note capture extension to 200+ active users on a fully local, privacy-first storage architecture with zero backend dependency.
- Owned the full product lifecycle solo – design, build, publish, and post-launch support – demonstrating independent end-to-end delivery of a live AI-adjacent productivity tool.

EXPERIENCE

Frontend Web Development Intern – AKS, May 2026 – Present
React, JavaScript, Node.js

- Ship feature implementations and bug fixes directly to a live, Vercel-deployed production codebase under an agile, cross-functional workflow, collaborating with backend and design counterparts to translate product requirements into working components.

Freelance Full-Stack Developer – DevInterio (devinterio.com), 2026

- Scoped, built, and deployed a 35-page business website end-to-end, including a custom admin backend, taking sole ownership of architecture through post-launch support with zero external help.

TECHNICAL SKILLS

AI & LLM: Claude API, OpenAI API, Chrome Prompt API, Prompt Engineering, LLM Integration

Languages: Python, JavaScript (ES6+), Java, SQL, HTML5, CSS3

Machine Learning: Applied ML fundamentals, model evaluation, scikit-learn (Python)

Backend & APIs: Node.js, Express.js, REST API Design, PHP

Frontend: React.js, Tailwind CSS, Canvas API

Tools & DevOps: Git, GitHub, Vercel, Railway, MySQL

CERTIFICATIONS

Applied Machine Learning in Python – University of Michigan, Coursera December 2025

Oracle Certified Foundations Associate: Java – Oracle University June 2026

Cloud Computing – NPTEL Elite, IIT Kharagpur April 2026
