SUMMARY

AI Application Engineer and full-stack developer experienced in financial data engines, multi-tenant FastAPI backends, and GenAI production systems across Python, Node.js, React, and local/cloud LLMs.

EDUCATION

VIT Bhopal University, Bhopal, India
Bachelor of Technology in Computer Science and Engineering (AI & ML) 2024–2028

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript (ES6+), SQL, PHP, HTML5, CSS3
AI / LLM Engineering: Whisper, Wav2Vec2, Groq SDK, Claude API, OpenAI API, LLaMA 3.3 70B, LLaMA 3.1 8B, Gemma 2 9B, Ollama, Prompt Engineering, Schema-Validated Output
Backend & Data: FastAPI, Node.js, Express.js, REST APIs, SQLAlchemy, Pandas, OpenPyXL, Pydantic, Zod, JWT Auth, Chrome Extension APIs
Frontend: React.js, Next.js, React 19, Vite, Tailwind CSS, React Router, Responsive Design, Accessibility
Databases & Cloud: PostgreSQL, Supabase, MySQL, Vercel, Render
Developer Tools: Git, GitHub, VS Code, Chrome DevTools

EXPERIENCE

AI Engineering Intern – NimbleBiz (Remote), Sept. 2026 – Present
Python, FastAPI, Next.js, TypeScript

- Architected an offline GST reconciliation and GL enrichment engine in Python, ingesting monthly ERP ledger dumps (3,000+ lines, >Rs. 92M tax flow) and 21+ state GSTR-2B filings via a cascading 5-tier matching algorithm (Exact, Fuzzy ±Rs. 2, Regex Normalization, Levenshtein, Inter-State CGST/SGST vs. IGST).
- Fixed an ERP aggregation failure where generic vendor descriptions (e.g., `AUG'26`) collapsed 565+ rental vouchers into single entities (Rs. 13.66L discrepancy); added 1-to-1 voucher isolation and Unicode/timezone normalization, reaching Rs. 0.00 audit variance across 9-sheet workbooks.
- Built a versioned, multi-tenant FastAPI layer around a Call Center AI engine (Whisper, diarization, Wav2Vec2 emotion detection, CSAT prediction, local LLM churn/QA analysis) without modifying the core processing engine, with Pydantic schemas and OpenAPI docs for client integration.
- Implemented JWT auth (bcrypt), verified cross-account isolation, per-account quotas, sliding-window rate limiting, and usage telemetry; rebuilding the product UI in Next.js/TypeScript on the FastAPI backend.

Frontend Web Development Intern – AKS (Remote), May 2026 – Sept. 2026
React, Firebase, Google OAuth, Typeform

- Built the hero, homepage, and login page in React for a live product; integrated Firebase/Google OAuth and a Typeform onboarding flow.

Freelance Full-Stack Web Developer – DevInterio, 2026
HTML, CSS, JavaScript, PHP, MySQL

- Scoped, built, and deployed a 35-page PHP/MySQL business website with a self-service admin panel (blog, video, gallery) for an interior design client (392 active users, 394 new users YTD), and handled post-launch support.

PROJECTS

StylistAI – AI-Powered Appointment Booking Assistant Live Demo | GitHub
React 19, Vite, Node.js/Express, Groq LLaMA, Supabase PostgreSQL, Google Calendar OAuth, Vercel/Render

- Built and deployed a full-stack conversational AI platform for service discovery, availability checks, and booking.
- Engineered a 3-tier fallback chain (LLaMA 3.3 70B, LLaMA 3.1 8B, Gemma 2 9B) with per-model retries that skip on rate limits or schema failures, and Zod-validated JSON output (100% schema-validation success on the live test suite).
- Injected live services, durations, stylist skills, and hours from PostgreSQL into the system prompt per request; the LLM only extracts intent and entities, while the backend owns availability so slots are never hallucinated.
- Prevented double-bookings with a unique (stylist, date, time) constraint; added Google Calendar OAuth sync and an AI-telemetry admin dashboard.
- V2 (in progress): frontend lead in a two-developer rebuild with role-based dashboards and server-enforced RBAC.

Brainstormzz – AI Whiteboard Canvas GitHub
React, Chrome Prompt API (Gemini Nano), OpenAI API, HTML5 Canvas

- Built an edge-first dual-inference engine: on-device Gemini Nano (Chrome Prompt API) first, falling back to OpenAI when unavailable.
- Designed schema-enforcing prompts that turn free-form ideas into expandable mind-map branches with multi-turn context.

AI Career Decision Engine & Resume Matcher GitHub
Claude API, Node.js/Express, pdf.js, Vercel/Railway

- Top 30 of 100+ teams in a GenAI Hackathon: scored resumes against 18 role benchmarks (50% skill overlap, 50% Claude-evaluated alignment) with gap analyses and roadmaps.

CERTIFICATIONS

Oracle AI Database SQL Certified Associate (Oct. 2026, ID 329262618DB23AISQLOCA)
Java Certified Foundations Associate – Oracle (Jun. 2026, ID 329262618JAVA8OJA) | Career Essentials in GitHub (Jan. 2026)
Cloud Computing (Elite) – NPTEL, IIT Kharagpur (Jan.–Apr. 2026, ID NPTEL26CS55S1052405143)
Applied Machine Learning in Python – Univ. of Michigan, Coursera (Jan. 2026, coursera.org/verify/7RSUPVFLCPS3)
