Summary

Full-Stack Software Engineer and AI Application Engineer experienced in financial data engines, multi-tenant FastAPI backends, and GenAI production systems across Python, Node.js/Express, React, and LLMs.

Education

VIT Bhopal University, Bhopal, India 2024–2028
Bachelor of Technology in Computer Science and Engineering (AI & ML)

Technical Skills

Languages: Python, Java, TypeScript, JavaScript (ES6+), SQL, PHP, HTML5, CSS3
Backend & Data: FastAPI, Node.js, Express.js, REST APIs, SQLAlchemy, Pandas, OpenPyXL, Zod, JWT Auth, Rate Limiting, Concurrency Control, Chrome Extension APIs
AI / LLM Engineering: Whisper, Wav2Vec2, Groq SDK, LLaMA 3.3 70B, LLaMA 3.1 8B, Gemma 2 9B, Ollama, Prompt Engineering
Frontend: React.js, React 19, Vite, Tailwind CSS, React Router, Responsive Design, Accessibility
Databases & Cloud: PostgreSQL (Supabase, NeonDB), MySQL, Firestore, Database Indexing, Vercel, Render, Railway
Tools: Git, GitHub, VS Code, Chrome DevTools

Experience

AI Engineering Intern – NimbleBiz (Remote) *Sept. 2026 – Present*
Python, FastAPI, Data Pipelines | LinkedIn

- Architected an offline GST reconciliation and GL enrichment engine in Python, ingesting monthly ERP ledger dumps (3,000+ lines, >Rs. 92M tax flow) and 21+ state GSTR-2B filings via a cascading 5-tier matching algorithm (Exact, Fuzzy ±Rs. 2, Regex Normalization, Levenshtein, Inter-State CGST/SGST vs. IGST).
- Fixed an ERP aggregation failure where generic vendor descriptions (e.g., `AUG'26`) collapsed 565+ rental vouchers into single entities (Rs. 13.66L discrepancy); added 1-to-1 voucher isolation and Unicode/timezone normalization, reaching Rs. 0.00 audit variance across 9-sheet workbooks.
- Built a versioned, multi-tenant FastAPI layer around a Call Center AI engine (Whisper, diarization, Wav2Vec2 emotion detection, CSAT prediction, local LLM churn/QA analysis) with JWT auth (bcrypt), tenant isolation, sliding-window rate limiting, quotas, and usage telemetry.

Frontend Web Development Intern – AKS (Remote) *May 2026 – Sept. 2026*
React, Firebase, Google OAuth, Typeform

- Built the hero section, full homepage, and login page as React components for a live, publicly deployed product.
- Integrated Firebase and Google OAuth 2.0 authentication and a Typeform "join as a cofounder" flow; designed PostgreSQL (NeonDB) schemas; worked in a 4-developer team using Git branching and code reviews.

Freelance Full-Stack Web Developer – DevInterio *2026*
HTML, CSS, JavaScript, PHP, MySQL

- Scoped, built, and deployed a 35-page business website for an interior design client with a custom PHP/MySQL backend and admin panel (392 active users, 394 new users YTD); compressed hero images ∼60% lighter.
- Built self-service admin tools for blog, video, and gallery management, and handled post-launch support (server config, .htaccess rewrites, gzip, cache-control headers).

Projects

StylistAI – AI-Powered Appointment Booking Assistant *Live Demo | GitHub*
React 19, Vite, Node.js/Express, Groq LLaMA, Supabase PostgreSQL, Google Calendar OAuth, Vercel/Render

- Built and deployed a full-stack conversational AI platform where customers discover services, check stylist availability, and book appointments in natural language.
- Engineered a 3-tier fallback chain (LLaMA 3.3 70B, LLaMA 3.1 8B, Gemma 2 9B) with Zod-validated JSON output, achieving 100% schema-validation success across the live test suite.
- Eliminated double-booking races with a partial unique index on (stylist, date, time) excluding cancelled bookings, plus a dual-layer availability check across PostgreSQL and Google Calendar free/busy data; added OAuth 2.0 calendar sync with failure fallback and an AI-telemetry admin dashboard.

NoteLift – Chrome Extension *Chrome Web Store | GitHub*
JavaScript, Chrome Storage API, Chrome Extension APIs

- Built and published a privacy-first text-to-note Chrome extension with **424 installs** and 50+ weekly active users, using browser-native storage with zero backend dependency.

Certifications

Oracle AI Database SQL Certified Associate (Oct. 2026, ID 329262618DB23AISQLOCA)
Java Certified Foundations Associate – Oracle (Jun. 2026, ID 329262618JAVA8OJA) | Career Essentials in GitHub (Jan. 2026)
Cloud Computing (Elite) – NPTEL, IIT Kharagpur (Jan.–Apr. 2026, ID NPTEL26CS55S1052405143)
Applied Machine Learning in Python – Univ. of Michigan, Coursera (Jan. 2026, coursera.org/verify/7RSUPVFLCPS3)
